

# Stormwater Trash Management Webinar

## Series #2 - Reducing the Impacts of Smoking on Stormwater Quality

Tuesday, January 30<sup>th</sup>, 2018  
10 am – 11:30 am

**Who should attend:** Municipal stormwater and solid waste program coordinators, staff and individuals interested in trash and litter control efforts – especially in the San Francisco Bay Area

### Webinar Agenda

- **Water Quality, Tobacco Product Waste and Toxicity**

*Dr. Thomas Novotny: San Diego State University and Cigarette Butt Pollution Project*

Dr. Novotny presents research on the impacts that cigarette butts, filters, packaging and other litter from smoking products are having on humans and wildlife, and water quality in creeks, the Bay and oceans.

- **Model Ordinances for Controlling Smoking-related Litter**

*Maya Hazarika Watts, JD: ChangeLab Solutions*

Most Bay Area municipalities have some regulations on the distribution, use and sale of smoking-related products. ChangeLab Solutions has model ordinances and information for municipalities to continue efforts in this area and to reduce the impacts on water quality. Can Extended Producer Responsibility models (used for pharmaceuticals, batteries, paint etc.) be a part of the solution?

- **Implementation Efforts to Reduce Smoking Impacts in the Bay Area**

*Allison Chan: Save the Bay*

What have Bay Area cities and organizations done to prevent smoking-related litter from entering the storm drains? This presentation will share ideas, results, lessons learned and next steps.

Register for the webinar by Friday, January 26<sup>th</sup>, 2018 using the following link:
